NETWORK PROJECT

ECTS credits: 4   **Period : year 2, semester 1**

Objectives:
This project concerns a hot topic in networking – this year its objective is to design and develop a server for multimedia streaming. Students have to organize their work by themselves, look for any documentation or existing code on the Web, and integrate independent parts into an operational prototype.

Contents:
Design and development of a server for multimedia streaming.

Prerequisites:
Computer Networks course
